STRACT

A detailed historical analysis of enrollment trends ystem-wide, by sector (public baccalaureates, community colleges, d independents), and by individual institutions in Michigan for the eriod 1964-1976 is provided. A special analysis of public ccalaureate institutions by statewide planning and development egions and by county for the five counties that provide the major are of known county enrollments is also presented. Major findings ow: (1) systemwide fall headcount enrollments more than doubled in e period 1964-1976; (2) the percentage of the population attending ollege is increasing; (3) more students are attending part time; (4) re students are Michigan residents; (5) five counties provide the jority of enrollments; (6) some regions in the State may be turated, others may not; (7) planning region I (southeastern chigan) supplies a major and constant share of baccalaureate nrollments; and (8) other variables such as unemployment, 11-12 rade enrollments, and state population, may affect public ccalaureate enrollments. Data relating to these findings are rovided in the appendix. (SPG)

PREFACE

Over the last decade, higher education enrollments in Michigan have increased dramatically. However, there is now reason to believe that this growth may be difficult to sustain in the future, and that present enrollment levels may actually decrease.

Consequently, in November, 1976, the State Board of Education named a task force composed of educators, state government representatives and research specialists to develop long-range enrollment projections for postsecondary education in Michigan.

This report, the first of two planned by the task force, contains a detailed historical analysis of enrollment trends systemwide, by sector (public baccalaureates, community colleges and independents) and by individual institutions for the period 196[illegible]-1976. It also features a special analysis of public baccalaureate institutions by statewide planning and development regions and by county for the five counties which provide the major share of known county enrollments. The final report, expected later this year, will present alternative enrollment projections for higher education, with particular emphasis on public baccalaureates.

The findings of both reports should be carefully reviewed by the Exeuctive Branch, the Legislature and individual institutions as state priorities and policies for higher education are re-evaluated in the months ahead.

John W. Porter
Superintendent of Public Instruction

ACKNOWLEDGEMENTS

This report could not have been prepared without the assistance of the Political Science Department at Michigan State University. Dr. Charles Cnudde, Chairperson, provided advice and assistance. Mrs. Harriet Dhanak, Director of the Politometrics Laboratory, provided technical consulting advice. Ms. Becky Carlson, graduate student, served as an M.P.A. intern on this project for the academic year 1976-77, and assisted in many aspects of the development of the report. Dr. James Homan of the Michigan Department of Education also provided helpful advice and Mr. Steve Cole provided editorial assistance. All of the above contributions are gratefully acknowledged.

INTRODUCTION

As most persons concerned with higher education are aware, college enrollments have grown tremendously since the mid-1960's. Now, however, some observers (including some of the public baccalaureate presidents[1]) believe this trend is changing and that it soon may become difficult, at least for certain individual institutions, to sustain current enrollment levels. This concern is based on several factors.

First, 9-12 grade enrollments are now declining from the peak level of 1972-73 and are projected to decline still more throughout the next decade.[2]

Second, in a reversal of the pattern of recent years, the state is experiencing a net outmigration of population, particularly among young men and women.[3]

---

[1] Comments by selected public baccalaureate presidents at Department of Management and Budget Director's Budget Hearings - FY 1978-79 State Colleges and Universities from October 17 to November 1, 1977 in Lansing, Michigan.

[2] Michigan's School Enrollment Decline: Projections and Implications (Lansing, MI.: Michigan Department of Education, 1977).

[3] See for example, Kurt Corwitz and Laurence S. Rosen, Implications of Michigan's Current and Projected Population Trends, Michigan State Economic Record (Vol. 19, No. 4) May, 1977.

Third, state support for higher education has declined over the last decade, resulting in major increases in student tuition and fee rates.[4]

Fourth, students are increasingly looking at the expense of higher education in terms of a return (such as future salary) on their investment and, as a result, many (rightly or wrongly) are "pricing down" from four year to two year institutions.

On the other hand, there are developing trends which could work to decrease or completely offset the potential impact of these factors. Lifelong (continuing) education, for example, is very much in vogue, and more and more people already established in their careers are seeking higher education for purposes of job promotion or personal enrichment. A change in women's aspirations has brought with it an increase in this group's college attendance patterns. And, the increasing availability of financial aid to lower income and minority groups has increased attendance rates for this segment of the population.

Thus, developing reliable short and long term enrollment projections that have credibility with both the higher education community and state government officials is a difficult and complex task.

---

[4] For details on tuition and fee rates, definition of access, and trends in state support for higher education, see Weston H. Agor, Financing of Higher Education in Michigan: A Staff Report Analyzing Trends From 1966-1976, (Lansing, MI.: Michigan Department of Education, 1977); Lee Peterson and Weston H. Agor, Report on Historical Undergraduate Tuition and Fee Rates and Residency Policies of Michigan Higher Education Institutions, (Lansing, MI.: Michigan Department of Education, 1977); and Access to Michigan Postsecondary Education, (Lansing, MI.: 1977).

This report contains a historical analysis of statewide enrollment trends based on Higher Education General Information Survey (HEGIS) data, on actual headcount data and on data for Fiscal Year Equated Students (FYES) in public institutions and Full-Time Equated (FTE) students in independent institutions.

To date, a data bank has been developed containing fall headcount enrollment data by county for all sectors of higher education and by institutions (where available) for the period 1964-1976, as well as other demographic data by county such as unemployment, per capita income and K-12 enrollments. Specifically, the analysis is by state-wide planning and development regions and by county for the five counties (Wayne, Oakland, Macomb, Genessee and Washtenaw) which provide the major share (61 percent) of public baccalaureate enrollments.

The Task Force originally sought to collect fall headcount enrollments for each institution for the years being studied. This objective was achieved for public baccalaureate, but not all community colleges and independents could supply the necessary information for the full time period. Therefore, 1976 is the first year for which there is virtually complete data by county and by institution for the entire statewide system.

The Task Force has also identified research methods (multiple regression techniques and historical trend analysis) which appear to have the potential for providing valid enrollment projections systemwide and by sector. However, due to the lack of complete information for community colleges and independents, projections for individual institutions (to be included in the second report of the Task Force) will have to be limited to public baccalaureate institutions. Nevertheless, the Task Force feels that the available data, when taken as a whole, are sufficiently revealing to be a useful guideline for community and independent colleges in making their own enrollment projections. In any event, the projections should provde invaluable to policymakers as they consider questions such as:

- Should the current funding formula be modified to further take into account the trends in the relationship between headcount and FYES students? (For example, do part-time students require a comparable level of services such as counseling as do full-time students, thereby justifying state support based on headcount as well as FYES totals?)

- Should the state develop and adopt clear statewide goals for the higher education system which would be used to guide the allocation of state appropriations?

- Should the present level of state support for higher education, overall and by sector, remain the same in the future or be increased or decreased?

- What share of higher education costs should be provided by state appropriations, and what share by student tuition and fees?

MAJOR FINDINGS

Following are the major findings contained in the data in the Appendix to this report. In some instances, the Task Force has included some comments on possible reasons for certain trends. This speculation is not intended to suggest any conclusions or to imply that any condition can be taken for granted. It is included only as food for thought for concerned readers and those who may wish to undertake additional study.

Systemwide Fall Headcount Enrollments Have More Than Doubled in the Period 1964 - 1976.

Systemwide fall headcount enrollments increased from 224,711 in the fall of 1964 to 486,234 in the fall of 1976. Although all sectors of Michigan higher education increased over this period (Table I), community college enrollments account for the major share of the increase, rising from 43,935 in 1964 to 188,496 in 1976, and from 20 percent of total systemwide enrollments in 1964 to 39 percent in 1976.

The Percentage of the Population Attending College is Increasing.

The ratio between headcount enrollments and population/11-12 grade enrollments has increased steadily from 1965 to 1976 for each sector of higher education. In other words, the percentage of the

population attending college has increased systemwide and thereby contributed to the sharp enrollment increase in the period under study. Specifically, while 2.77 percent of the state's population was attending an institution of higher education in 1964, the figure had risen to 5.3 percent by 1976. A similar trend is registered in relation to 11-12 grade enrollments. There could be several reasons for this. As noted in the Introduction to this report, there is a great deal of interest in continuing education, more women are attending college, and financial aid is more widely available today than in previous decades. Also, growth itself produces growth. For example, as institutions expand they must, of necessity, offer more varied programs and facilities and these programs and facilities, in turn, attract even more students.

More Students are Attending Part Time.

All sectors of higher education show an increase in the number of part-time students since 1964. This can be seen by the systemwide decrease (Figure III and Table I) in the ratio of FYES and FTES to headcount enrollments from .8443 in 1960 to .7614 in 1976. This trend is particularly pronounced among community colleges where each headcount student in 1976 generated only slightly more than one-half of

an FYES student. Also, a substantial variation (Tables III and IV) exists between institutions for both public baccalaureates and community colleges. This variation may be due to the types of programs offered, commuting distances or other factors.

Most Students are Michigan Residents.

Nearly 93 percent of systemwide enrollments (Tables V and VI) are Michigan residents, the remainder being from other states and countries. This percentage varies considerably by sector from a low of .5 percent for community colleges to a high of 19.9 percent for independents. It should also be noted that, statewide, out-of-state/country students dropped from 13.7 percent of public baccalaureate enrollments in 1964 to 9.4 percent in 1976 (Table VII). The University of Michigan-Ann Arbor had the highest percentage (23.6) of its total enrollment from out-of-state/country in 1976 while the University of Michigan-Dearborn had the lowest (.5 percent).

Five Counties Provide the Majority of Enrollments.

Five counties (Table VIII), Wayne, Oakland, Macomb, Genessee and Washtenaw, provide 60.7 percent of known county enrollments systemwide. By sector, the figures vary from 59.5 percent of public baccalaureates to 69.6 percent for independents. Among public institutions,

three southeastern counties (Table IX) account for a major portion of the total known county headcount enrollment for many individual baccalaureate and community colleges. One of the most interesting findings is that several community colleges geographically distant from southeast Michigan still show 4 percent or more of their enrollments to be from three southeastern counties, a fact that is particularly relevant in evaluating the community college redistricting bill currently before the Legislature - since it proposes a system of exclusive community college districts to serve the entire state.

Some Regions in the State May Be Saturated, Others May Not.

The ratio between fall headcount enrollments (known county) and 11/12 grade enrollments (Table X) varies substantially among state planning and development regions from a low of 34 percent in Region IX to a high of 93 percent in Region XII. This suggests that there may be considerable potential in several regions for increasing enrollments, whereas other regions may be closer to the saturation point.

Region I Supplies a Major and Constant Share of Baccalaureate Enrollments.

Planning Region I (southeastern Michigan) supplied the major share (57.4 percent) of known county public baccalaureate enrollments in 1976 (Table XI), versus only 49.5 percent of 11-12 grade enrollments,

a share which has remained relatively constant over the period 1964-1976. However, an analysis of county trends within the region shows major enrollment and demographic adjustments which could bring increasing pressure on certain institutions if present trends continue.

Tables XII through XXI outline the trends within and among the five major counties which accounted for 59.5 percent of statewide known county enrollments in 1976. Take, for example, Wayne County which accounts for the largest share of statewide county enrollments. In 1964, the county provided 32 percent of total statewide county enrollments - but by 1976 this figure had dropped to 26.5 percent. During the same period, the county experienced a decline (both absolute and in the relative share of the state total) in population and 11-12 grade enrollments. These trends suggest that public baccalaureate institutions which rely heavily on Wayne County for a major share of their students will suffer a decline in enrollments unless students are attracted from other counties or overall attendance rates are increased in some other way.

Oakland County, on the other hand, has been increasing its share of the state's population and public baccalaureate and 11-12 grade enrollments since 1964. Thus, public baccalaureate institutions which rely heavily on this county would appear to be in a relatively better position to sustain enrollments.

Another factor is apparent from reviewing the region's enrollment trends by county. In 1964, fewer public baccalaureate institutions existed to compete for potential enrollments. As the number of institutions increased and other demographic trends shifted direction (for example, Wayne County's population decline), the competition for students has increased in some counties and leveled off in others. Whether all the existing institutions will be able to compete under these circumstances is a question which deserves careful review by policymakers. In fact, the issue has already been raised by some of the public baccalaureate presidents attending the Department of Management and Budget Hearings last fall.

And Finally, Other Variables May Affect Public Baccalaureate Enrollments.

Pending the results of precise computer-assisted statistical correlational analysis currently under way, preliminary analysis of available data (Figures IV through VI and Table XXII) suggests that the variables of 11-12 grade enrollments, state population and unemployment may directly affect the pattern of enrollments statewide, by county and by state planning and development regions.

For several of the years 1970-1976, public baccalaureate enrollments appear to increase when unemployment increases. A comparison between statewide unemployment rates (Table XXII) and community college/independent enrollments (Table I) shows a similar relationship.

This paradox of more people attending college at a time when fewer can afford it raises a number of questions. It would be interesting to know if requests for financial aid increase in relation to high enrollment/high unemployment, and whether more students choose part-time, short-term or specific career programs in such periods. It would also be interesting to compare the ages, sex and marital status of students enrolling during periods of high unemployment against those enrolling during periods of low unemployment, since certain groups (the young, the unmarried, some women) could be expected to have fewer purely economic reasons for continuing to seek employment over a long period.

Headcount enrollment trends also appear to be related to 11-12 grade enrollment trends statewide, although variations are noted between state planning and development regions and from county to county.

APPENDIX

DATA BASE

This report is based on data provided and verified by the individual institutions. Data collected from other sources is published in documents as noted or footnoted in the tables.

The data used for this report and the upcoming projection report is presently housed in the Department of Education Computer Center, but is not available on an interactive basis at this time due to a lack of adequate staff support and funding.

The data presently contained in the data bank includes: (1) fall headcount enrollment by county for public baccalaureate institutions 1964-1976; for all community colleges, except two, in 1976, and for earlier years for selected institutions; for independents, except 12, in 1976, and for earlier years for selected institutions; (2) HEGIS headcount data by institutions systemwide 1964-1976; (3) FYES data by institution for public institutions and FTE data for independents 1964-1976; (4) state support for individual public baccalaureate institutions and community colleges 1965-1976; (5) undergraduate, 1965-1976, and graduate, 1970-1976, tuition and fee rates for public baccalaureates, undergraduate tuition and fee rates for independents, and in-district and out-of-district rates for community colleges 1965-1976; (6) room and board rates systemwide 1965-1976; (7) K-12 enrol-

iments by grade and by county for both public and private schools 1965-1976; (9) projected K-12 enrollments for both public and private schools by county 1977-1990; (9) employment and unemployment totals by county 1970-1976;(10) per capita income by county 1965-1975; (11) population estimates (actual 1970 U.S. Census) by county 1964-1976 (Department of Public Health through 1969 and Department of Management and Budget thereafter); (12) projected population by county prepared by the Department of Management and Budget (DMB) to 1990 (the 1970 population data forward is available by individual age group, sex and race).

Since this report was prepared, DMB has prepared revisions of their 1970-1976 county population estimates which are in the data bank but not in this report.

Terms and Categories Used in Report

The following terms and categories used in the report are defined as follows:

Enrollment

1. Known County - fall headcount by county enrollment.

2. Other Michigan - fall headcount enrollment from Michigan, but county unknown.

3. Out of State/Out of Country- fall headcount enrollment from other states or countries.

4. Other Unknown - fall headcount enrollment, but residence unknown.

5. Institutional Total - total fall headcount enrollment from all Michigan counties and the other categories noted above.

6. HEGIS Total - Fall headcount enrollment submitted on the Higher Education General Information Survey to the Department of Education and subsequently verified/or corrected by the institutions for this specific project. Theoretically, institutional total and HEGIS total should be the same, but due to the timing of the completion of the HEGIS report, the data is not exactly the same.

7. FYES/FTE - FYES is fiscal year equated student as defined by the Legislature in the higher education appropriation bill. FTE is full-time equated student as defined on the HEGIS form. FYES is used for public institutions, and FTE for independents.

Note: FYES is used for public institutions and full time equivalent is used for independent institutions.

*Source: Data as submitted to PEP Task Force. Institutional totals are fall headcount enrollments as submitted by the institutions which is also available on a by county basis. Public baccalaureate institutions have provided this data for the full period 1964-1976, but it is available in 1976 only for community colleges and independents. The 1976 data for community colleges does not include Kellogg Community College and North Central which have not submitted by county data to date, and for independents does not include twelve schools where data is not available (Calvin Theo., Center for Creative Studies, Concordia, Cooley Law, Cranbrook, Davenport, Detroit College of Law, Faithway, Kalamazoo, Northwood, Olivet, and Western Theo. Seminary). HEGIS data has been corrected by institutions vs. numbers previously submitted to Department of Education over the years Institutional totals are different than HEGIS numbers primarily because the HEGIS report is filed before complete data on enrollments is available. Institutional totals for fall headcount are believed to be the most accurate of the two figures (these totals should represent only credit generating enrollment). FYES and FTE data is provided by the institutions (FYES for public institutions, and FTE for independents). FYES data is the same as contained in the Executive Budget 1977 and in Senate Fiscal Agency historical enrollment reports (Historical Enrollment Summary and Statistical Report) with minor corrections by the institutions of earlier errors. FTE data for independents is as is submitted on HEGIS reports with minor corrections by the institutions for earlier errors. In 1976, FTE is defined as 15.5 credit hours for undergraduate, and twelve hours for graduate. In earlier years, HEGIS instructions enabled institutions to define a FTE as anywhere between 12-15 hours/semester.

Statewide Known County Total	208,505(48.2)	186,885(43.2)	36,769(8.5)	432,159(100)
Total Michigan	14,757	191,944	39,947	446,998

[1]Includes 1975 data for Highland Park since in 1976 data was not provided.

[2]Data is not available by county for Calvin Theo., Center for Creative Studies, Concordia, Cooley, Cranbrook, Davenport, Detroit College of Law, Faithway, G.R. Bible, Hillsdale, Kalamazoo, Michigan Christian, Northwood, Olivet, Reformed Bible, St. Mary's, and Western Theo.

Table IX

Three Major Counties' Share (%) of 1976 Known County Enrollments in Public Institutions of Higher Education (Fall Headcount)

Public Baccalaureate Institutions[1]			
Central Michigan	22.4	Oakland	67.7
Eastern Michigan	79.1	Saginaw Valley	5.1
Ferris State	18.9	U of M - Ann Arbor	69.9
Grand Valley	9.1	U of M - Dearborn	96.7
Lake Superior	13.4	U of M - Flint	2.2
Michigan State	37.5	Wayne State	83.2
Michigan Tech.	23.0	Western Michigan	26.1
Northern Michigan	17.2	Statewide	49.0
Community Colleges[2]			
Alpena	4.2	Macomb	100.0
Bay de Noc	0.1	Mid Michigan	1.5
Mott	98.1	Monroe	0
Delta	0.8	Montcalm	0
Glen Oaks	0	Muskegon	0
Gogebic	0	North Central	2.0
Grand Rapids	0.5	Northwestern	4.2
Henry Ford	95.8	Oakland	8.5
Highland Park	99.0	Schoolcraft	94.9
Jackson	0.4	Southwestern	0
Kalamazoo Valley	0.3	St. Clair	2.1
Kellogg	NA	Washtenaw	9.7
Kirtland	4.2	Wayne	100.0
Lake Michigan	0	West Shore	0.6
Lansing	1.0	Statewide	47.0

[1]Three major counties are Oakland, Wayne, and Washtenaw.

[2]Three major counties are Macomb, Wayne, and Genesee.

SOURCE: HEGIS data subsequently corrected/verified by the institutions as submitted to the P&P Task Force. FTE for independent institutions is defined in 1976 as 15.5 credit hours for undergraduates and 12 hours for graduates. In earlier years, HEGIS instructions enable institutions to define a FTE as anywhere between 12-15 hours/semester.

TOTAL ALL INSTITUTIONS Percent of Total	242,083 (100.0)	265,387 (100.0)	284,704 (100.0)	304,509 (100.0)	319,589 (100.0)	323,128 (100.0)	320,862 (100.0)	326,472 (100.0)	355,180 (100.0)	382,317 (100.0)

SOURCE: Private FTE's come from HEGIS and were updated by the institutions and submitted to the State Board of Education Task Force on Long-Range Enrollment Projections for Postsecondary Education. FTE is defined as "those whose academic load coursework or other required activity is at least 75% of the normal full-time load," which is normally 15 hours. Public baccalaureate and community college enrollments on a FYES basis are defined as contained in the operating appropriations bills. The actual data is provided by the institutions and is virtually the same as data contained in Executive Budget 1977-78 for public baccalaureates and the Senate Fiscal Agency documents for community colleges.
